INTRODUCTION

This publication is intended to help you understand and interpret entries on the driving records available from Oregon Driver and Motor Vehicle Services (DMV).

RECORD TYPES

There are four types of driving records available: Certified court prints, Non-employment driving records, Non-employment open-ended driving records, and Employment driving records.

- The **Certified court print driving record** includes most traffic violations and accident entries for at least the previous five years. Serious criminal traffic offenses, such as driving under the influence of intoxicants, may remain on the record permanently.
- The **Non-employment driving record** has entries for at least the previous three years. This record lists all non-employment related accidents, convictions, suspensions, cancellations, revocations and diversion agreements.
- The **Non-employment open-ended driving record** contains the same information as a non-employment driving record but is not limited to three years and is available only for the purpose of providing insurance discount to an individual.
- The **Employment driving record** is a three-year record that is limited to convictions and accidents the driver had while on the job.

For each record type there are two versions of the record available, a version containing the driver's personal information, and a version that has the driver's personal information removed (sanitized). Personal information is removed from a record if a requestor does not qualify to receive it under Oregon's Record Privacy Law (ORS 802.175-802.191) or does not have a written, notarized permission slip from the individual whose information is requested.

Personal information is: Driver License, Driver Permit or Identification Number; Name; Address; and Telephone Number.

Under Oregon's Record Privacy Law only certain qualified entities are allowed to receive personal information. These include such entities as: attorneys, legitimate businesses, insurance companies, police agencies, and other government agencies. See the "DMV Records & DAVE Accounts" section in the DMV website (www.oregondmv.com) for additional information.

FIXED ENTRIES

Fixed entries generally include information we record for each driver/customer, such as: name, address, and date of birth. This portion of the record also contains information about any identification card or Oregon driver license the person holds, as well as endorsements, restrictions and expiration dates.

VARIABLE ENTRIES

Variable entries are those that make up an individual's driving history; such as accidents, convictions, suspensions, revocations, cancellations and other administrative actions. Variable entries may also include information about the type(s) of license, permit, and/or endorsement the person holds (or has held in the past).

FINANCIAL RESPONSIBILITY

Financial responsibility means the ability to pay for damages resulting from an automobile accident. The Financial Responsibility Law requires that proof of financial responsibility be carried in any vehicle operated on public highways or roads. Future responsibility must be filed and maintained for three years with DMV by persons suspended for the following reasons: uninsured accident, fail to furnish proof of insurance, driving uninsured and false certification.

Future responsibility filings are also required at the end of mandatory suspensions or revocations issued by a court or DMV. These include traffic crimes such as reckless endangerment, menacing, criminal mischief, failure to perform the duties of a driver in an accident, reckless driving, DUII, etc.

IGNITION INTERLOCK DEVICE

Ignition interlock devices (IID) are required for drivers convicted of driving under the influence of intoxicants (DUI) in Oregon. Drivers suspended for DUI are required to have an IID on any vehicle they operate for one year from the end date of the DUI suspension on a first conviction or two years from the end date of the DUI suspension on a second or subsequent conviction as well as during the suspension if the driver applies for a hardship permit. A court shall also require a driver to install an IID as a condition of a DUI diversion agreement. The following is an example of how IID entries appear on a driving record:

(a) (b) (c) (d)
STOP ACTION 01/02/011 01/02/13 IID REQUIRED

MEDICALLY EXEMPT	The person has an exemption from the IID requirement due to a medical condition.

Suspension, Revocation, and Cancellation

Suspension is the temporary withdrawal of driving privileges. **Revocation** is the termination of driving privileges. **Cancellation** means the driver's license or ID card is void and terminated. All these actions affect the status of Oregon driving privileges.

NOTE: **Withdrawal** (WTHD) is an entry used to record an action taken in another state. DMV records "Withdrawals" for historical/informational purposes. Withdrawal entries should not be used to determine if a driver has valid driving privileges in Oregon or in another state.

The following are three examples of the format used for Suspensions, Revocations or Cancellation actions taken by Oregon. Following the Oregon examples is an example of a *Withdrawal* segment using the ACD format to record actions taken in other states; it is the standardized format used to transfer record information on from state to state.

The extension code and offense literal displays directly below the action to which it corresponds (see field (k) in Suspension, Cancellation, Revocation, page 21). See the Standard Convictions Abbreviation Table starting on page 46 for a summary of the offense literal.

STANDARD CONVICTION ABBREVIATIONS TABLE

The Standard Convictions Abbreviations table contains the standard conviction abbreviations used by DMV to post convictions to driving records. The table is made up of the following four columns:

COLUMN 1 – LITERAL

This column contains either the Oregon conviction abbreviation (literal) or the out-of-state ACD code.

Oregon conviction abbreviations are three to 12 character alpha/numeric abbreviations for the offenses.

ACD codes are the standardized codes as determined by the AAMVA Code Dictionary (ACD) used to transfer driving record information from state to state. ACD codes are three characters; an alpha character followed by a two-digit number. These codes appear on Oregon driver records as convictions or withdrawals

- when an out-of-state commercial licensed driver moves to Oregon and the driver's previous state driving record is transferred electronically to Oregon; or
- when an Oregon licensed driver receives a conviction in another state. The out-of-state conviction is entered on the Oregon driver record using ACD codes.

COLUMN 2 – CITE

This column references the Oregon Revised Statute (ORS) or other cite authority for the offense. The following are examples of the entries found in this column.

807.610..... ORS Chapter 807, Section 610.

F397.5..... Federal Motor Carrier Safety Regulations, as contained in Title 49 of the Code of Federal Regulations, Part 397, Section 5.

L O..... Local (town/city) Ordinance

COLUMN 3 – CLASSIFICATION

This column lists the maximum (most serious) classification (class) type and code allowed for the offense. The driving record may show a **lesser** class type and code than the one noted in the table column, but not higher.

Class Types (‘F’ being the most serious)	Class Codes (‘A’ being the most serious)
F – Felony	A
M – Misdemeanor	B
V – Violation	C
LO - Local Ordinance	D

COLUMN 4 – TEXT

This column contains a summary of the offense as written in applicable law, regulation, or rule. If the abbreviation shown in the “Literal” column (1) is an ACD code, the text column will contain the standardized definition of the code.

Conviction information shown in *SUBSCRIPT* text indicates the entry type is obsolete. Obsolete entry types are no longer used (entered on records), but may still appear on some driving records.
